

Accelerate claim payment with analytics-driven claims management

Bundled solutions for provider organizations

Avoid payment delays and denials

Assurance Reimbursement Management™ is an analytics-driven claims and remittance management solution designed to reduce payment obstacles and optimize staff productivity with intuitive, exception-based workflows.

The cloud-based system helps automate repetitive and labor-intensive tasks enabling more focus on revenue-producing functions. It also helps reduce IT dependence and costs.

Assurance Reimbursement Management provides hospitals, physician practices and other ancillary providers capabilities that accelerate claim payment, reduce denials, improve resource utilization and reduce costs. These capabilities include customizable workflows, comprehensive editing, integrated Medicare claims management, denials management and advanced analytics modules.

Solutions to meet your needs

To further maximize solution value and support, Assurance Reimbursement Management offers bundled capabilities so you can choose what best aligns to your organization's needs.

Assurance Edits as a Service™ (EaaS) module		●
Assurance Test System module		●
Pulse Revenue Cycle Benchmarking™ solution		●

Modules

Assurance Reimbursement Management module	Includes
Assurance Core™ (edits and claims submissions)	Upload claims to run edits and ensure they are clean, submit to payers and track claim status until finalized.
Assurance Eligibility Edits™ module	Monitor for changes in plan enrollment, data collection, coverage limits and dependent coverage to help ensure prompt payment and help prevent denials.
Assurance Data Extraction and Posting™ (DEP) module	Import claims data into your EMR from Assurance to access claims data directly in your EMR.
Acuity Revenue Cycle Analytics™ solution	This analytics-driven revenue cycle management solution gives providers a cross-functional view to make timely decisions impacting financial outcomes, staff productivity and the patient experience.
Assurance Attachments™ module	Submit workers' compensation and property and casualty claims with their associated attachments, bypassing the effort and expense of paper processing.
Assurance Attach Assist™ module	Send attachments electronically to meet the increasing number of requests for additional documentation from Medicare, Veterans Affairs and several other non-Medicare payers, including Medi-Cal.
Assurance Medicare Direct Entry™ (MDE) module	Integrate Medicare claim processing and speed payment by one day. Reduce follow-up time and accelerate claim payment with automatically generated secondary claims.

Modules

Assurance Reimbursement Management module	Includes
Assurance Paper Claims™ module	Printing and delivery of primary paper claims is available for your organization, with the option of adding collated claims and EOBs for secondary claims.
Assurance Hard Copy Direct™ module	Manage secondary volume by automatically generating the secondary claim and explanation of benefits (EOB) from the primary remittance advice, including the ability to print and mail claims in house.
Assurance Direct Data Entry™ module	Check eligibility, edit, send claims and check status without leaving the solution.
Assurance Test System™ module	Integrate testing decisions into the planning process to validate key business and technical decisions, and identify defects and missed implementation teams valuable time to remediate problems with little or no impact on project timelines.
Assurance Remittance Management™ module	Increase automation of secondary billing and enhance reconciliation capabilities. Remittances from connected payers and other sources can be formatted and delivered for easy posting into host system.
Assurance On Demand Claim Status™ module	Allows you decide when to request claim status outside the typical claim status request schedule. You can automate the status request workflow and take advantage of connectivity to some payers in real time for status information.
Assurance Edits as a Service™ (EaaS) module	Edit pre-bill claims to help prevent denials, reduce claim rework and speed claim submission.
Pulse Revenue Cycle Benchmarking™ module	This analytics-driven competitive analysis solution gives providers increased visibility into their claims cycle performance, helps benchmark performance with peers and quickly address obstacles.
