

Automate patient engagement with AI voice agents

Staff shortages, missed calls, and limited hours holding you back from reaching patients?

Our AI agent answers your phone and calls patients to close care gaps 24/7. Fully automate repetitive admin tasks like scheduling preventative care visits and post-discharge follow-ups. Your members will never have to wait on hold and you'll never miss a call again.

You'll be able to engage more patients without increasing staff.

Schedules appointments

Our agent can schedule, reschedule, or cancel appointments without human intervention by integrating directly with your EHR or practice management system.

Manages referrals

Calling and following up with inbound referrals is tedious. Our AI agent will call patients and get them scheduled in a timely fashion — increasing visits and revenue.

Closes VBC care gaps

Automate outbound calls to schedule annual wellness visits and post-discharge follow-ups. Improve value based care (VBC) quality metrics without extra staff.

2-way texting

Offer patients texting capabilities. Our AI agent will answer incoming SMS text messages. Your staff can send and reply any time too.

Answers FAQs

Insurance questions, pricing, procedure information? Our agent ingests your knowledge base and continuously self-updates.

Available 24/7

Patients call at all times of the day. Stop missing calls because no one is staffed. Meet patients on their schedule. Any day, any time.
