

Revenue Performance Advisor

Patient Statements

Patient Statements, part of the Revenue Performance Advisor suite, automates and optimizes the generation, printing and mailing of patient statements. It can help reduce bad debt write-offs and decrease days spent in accounts receivable.

- **Custom statements for no additional cost:** The system uses digital printing to produce clear and concise statements, automatically customizing them with the provider's logo, colors and address at no additional cost. Real-time phone communication is used for any required changes during production, with immediate email confirmation to help achieve accuracy and efficiency.
- **Clean up bad addresses:** This solution integrates intelligent barcode technology and USPS® NCOALink® (National Change of Address) and CASS certification to manage and correct bad addresses efficiently. Returned mail triggers an electronic report that's integrated into practice management systems through an easy-to-use interface. Statements are resent to the most current addresses provided.
- **Multiformat filing:** Patient Statements can accept files in any format and from any PMS or billing system.
- **Easy to set up:** The average setup time is less than 2 weeks.

Easier-to-read statements make it easier to get paid in full.

Patient Statements provides a one-stop source for fast and effective statement processing, printing and mailing.
